

# GRAZERS - EFFECTIVE AGAINST DAMAGE

Contains Calcium and other ingredients:

Calcium Chloride Solution - 6% Calcium Oxide, 4.5% w/w Calcium

- Rabbits
  - Pigeons
  - Deer
  - Geese
- and also **Mice & Voles**

**Application rate:** 4 capfuls (80ml) in 5 litres water (3 teaspoons per litre).

Apply using a conventional hand sprayer or knapsack sprayer with a fine nozzle (NOT a watering can). Spray just to wet the leaf. In areas of high infestations it is safe to double the application rate.

The recommended spray interval is 4 weeks, however this can be modified e.g. in situations where treated grass is mown, plants are watered or periods of prolonged heavy rainfall follows spraying, repeat applications may be needed sooner.

**NEW PLANTS ARE ESPECIALLY VULNERABLE TO DAMAGE.** Spray at least twice prior to planting (allow leaf to dry between sprays). Spray again once planted. Avoid spraying in bright sunlight.

**Instructions:** Shake vigorously before use. Wash sprayer before and after use. Spray foliage (using a fine nozzle) on any plants while dry, where damage has occurred or is at high risk. Spray foliage until just wet.

**Note:** *It can help to add a small amount of detergent when spraying plants with a waxy leaf (e.g. cabbages and broccoli).*

**Harvest interval:** For edible crops we recommend one weeks interval between final treatment & harvest.

**Storage:** Will keep for 2 years when stored in cool, dark conditions.

**Precautions:** Avoid contact with skin and eyes. Ingestion may cause vomiting. If irritation or symptoms persist seek medical advice.

Leave at least 3 days – before or after – any other spray applications.

DO NOT MIX WITH ANY OTHER MATERIAL

Grazers is NOT a pesticide and is therefore harmless to children, pets, wildlife and the environment.

**Grazers is very safe to use and beneficial to the plant.**

**PLEASE RECYCLE THIS  
BOTTLE AFTER USE**

**CONTENTS: 750ml**
