STRENGTHENS GROWTH**

*live and
let grow!*

350ml e CONCENTRATE - Makes 7L/9 refills of 750ml G4 RTU

Grazers G4 Concentrate

**Effective against damage from
lily beetles (at all stages)**

Contains Calcium and other ingredients:
calcium chloride solution - 10% CaO, 7.2%
w/w calcium.

Dilution: Simply add 3 caps full (45ml) of
G4 concentrate into the G4 trigger sprayer
and top up with 750ml water. **OR** 50ml G4
concentrate per 1 litre of water.

Note: bottle top holds 15ml when full (can be used as a measure).

Instructions: Shake vigorously before use.
Wash sprayer before and after use. Spray
foliage (using a fine spray) on any plants at
risk while dry. Apply to foliage using the
G4 trigger sprayer or conventional garden
sprayer (NOT a watering can). Spray to
cover the whole leaf area (including
underside). Avoid spraying in bright
sunlight or frosty conditions.

Note: Seedlings under protection are very
tender and prone to scorch from using any
spray product. Harden off young plants by
bringing them outside gradually over a
week or more before spraying.

Frequency: Spraying weekly, while at risk,
is effective against damage and benefits
the plant. Proactive treatment is better
than reactive.

Storage: Will keep for 2 years when stored in
cool, dark conditions.

Precautions: Avoid contact with skin and eyes.
Ingestion may cause vomiting. If irritation or
symptoms persist seek medical advice.

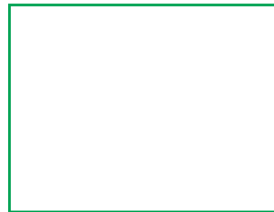

Allow leaf to dry before applying any other
product.

DO NOT MIX WITH ANY OTHER MATERIAL

**Grazers is harmless to children, pets, wildlife
and the environment.**

**Grazers is very safe to use and beneficial to
the plant. (Grazers does NOT contain any
animal by-product).**
