Our Products
**Do Not
Harm,
anything!**

750ml e

grazers G1

**EFFECTIVE AGAINST DAMAGE EXPECTED
FROM RABBITS, PIGEONS AND DEER**
+ geese, mice, voles & squirrels

Application Directions

- Shake; twist nozzle; squeeze trigger
- Spray susceptible plants proactively before first damage, or very soon afterwards
- Apply a light covering to the dry leaf, up to a maximum of run off, not in direct sunlight or in freezing conditions
- Safe to spray from early growth stage
- After initial, frequent applications, apply monthly or as needed*
- Prior to using left-over product, shake well again before application

*Advised (& safe) to spray more frequently if there are high pest numbers, prolonged rainfall or plant watering after spraying, or if plants are growing rapidly.

RECOMMENDATIONS: New plants are especially susceptible to pest damage, so for new transplants; spray twice or more 24-48 hours before planting out and again a few days after planting. Take care to not spray plants too recently transplanted, for instance straight out of the greenhouse. Allow foliage to dry before applying other sprays.

Standard harvest interval advice: Leave 1 week after last application.

GRAZERS products also strengthen and stimulate your plants for robust growth. No harm to pests.

CONTENTS: Grazers contains a specific calcium solution, with plant extracts and adjuvants in a ready to use solution with water. Can keep for 2 years when stored in cool, dark conditions.

Grazers products do not contain any animal by-products.
