anything!

350ml e Grazers G2 Concentrate
Dilutes to 12 refills of Grazers G2 750ml RTU

Grazers G2 Concentrate

EFFECTIVE AGAINST DAMAGE EXPECTED
FROM SLUGS & SNAILS

Shake vigorously before dilution

Dilution: Using the bottle cap, pour 2 capfuls (30ml) into the G2 trigger sprayer and top up with water (750ml). If another sprayer is used; mix 40ml (≈ 3 capfuls)/litre water.

[NB: Never apply undiluted product to plants]

Application Directions (once diluted):

- Apply every 7-10 days* to susceptible plants, before slugs and snails arrive
- Apply a light covering to both sides of dry leaf, up to run off and not in direct sunlight or in freezing temperatures.
- Safe to spray from early growth stage
- Prior to using left-over product, shake well again before application

*Advised (& safe) to spray more frequently if there are high slug or snail numbers, prolonged rainfall/overhead watering, or if plants are rapidly putting on new growth.

RECOMMENDATIONS: Spray twice, or more, 24-48 hours before planting out, as plants most prone to slug and snail attack at this time. Avoid application for at least 4-5 days after transplanting or transferring from greenhouse. Allow foliage to dry before applying other sprays. **Standard harvest interval advice:** Leave 1 week after last application.

GRAZERS products also strengthen and stimulate your plants for robust growth. No harm is done to the pests, so this encourages natural predators back into the garden, e.g. songbirds and ladybirds, amongst others.

CONTENTS: Grazers contains a specific calcium solution, with plant extracts and adjuvants in a concentrated form that must be diluted. Can keep for 2 years when stored in cool, dark conditions.

Grazers products do not contain any animal by-products.

slug & snail
concentrate

**Warning: Causes serious eye
irritation**

If medical advice is needed, have product container or label to hand. Keep out of the reach of children. Wear protective gloves/eye protection. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Read the label
before use.
