grazers **G4**

## EFFECTIVE AGAINST DAMAGE EXPECTED FROM LILY BEETLES

### Application Directions

- Apply weekly\* and be sure to spray the lily plants before beetles arrive in early spring
- Apply a light covering to both sides of dry leaf, up to run off and not in direct sunlight or freezing temperatures
- Safe to spray from early growth stage
- Prior to using left-over product, shake well again before application

\*Advised (& safe) to spray more frequently if there are high pest numbers, prolonged rainfall (or overhead watering), or if plants are rapidly putting on new growth.

**RECOMMENDATIONS:** When introducing new plants, check for Lily Beetle presence and remove, then start applications immediately.

Allow foliage to dry before applying other sprays.

**GRAZERS products also strengthen and stimulate your plants for robust growth.** No harm done to the pests, so encourages natural predators back into the garden, e.g. songbirds and amphibians, amongst others.

**CONTENTS:** Grazers contains a specific calcium solution, with plant extracts and adjuvants in a ready to use solution with water. Can keep for 2 years when stored in cool, dark conditions.

**Grazers products do not contain any animal by-products.**
