**Do Not
Harm,
anything!**

350ml e Grazers G4 Concentrate
Dilutes to 8 refills of Grazers G4 750ml RTU

Grazers G4 Concentrate

EFFECTIVE AGAINST DAMAGE EXPECTED
FROM LILY BEETLES

Shake vigorously before dilution

Dilution: Pour 3 capfuls (45ml) from this bottle into the G4 trigger sprayer and top up with water, to 750ml. If another sprayer is used; mix 60ml (4 capfuls)/litre water.

[NB: Never apply undiluted product to plants]

Application Directions (once diluted):

- Apply weekly* and be sure to spray lily plants before beetles arrive
- Apply a light covering to both sides of dry leaf, up to run off and not in direct sunlight or in freezing temperatures
- Safe to spray from early growth stage
- Prior to using left-over product, shake well again before application

*Advised (& safe) to spray more frequently if prolonged rainfall or overhead watering.

RECOMMENDATIONS: When introducing new plants, check for Lily Beetle presence and remove, then start applications immediately. Allow foliage to dry before applying other sprays.

GRAZERS products also strengthen and stimulate your plants for robust growth. No harm is done to the pests, so this encourages natural predators back into the garden, e.g. songbirds and ladybirds, amongst others.

CONTENTS: Grazers contains a specific calcium solution, with plants extracts and adjuvants in a concentrated form that must be diluted. Can keep for 2 years when stored in cool, dark conditions.

Grazers products do not contain any animal by-products.
